Art Unit: 1632

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 13-18, 22, drawn to methods of reconstruction a mammalian embryo comprising transferring a mononuclear cell from the blood or natural secretion of a mammal into a suitable recipient and methods of preparing a mammal by allowing the embryo to develop to term.

Group II, claim(s) 19-21, drawn to a method of reconstruction a mammalian embryo comprising reconstructing a first general embryo comprising transferring a mononuclear cell from the blood or natural secretion of a mammal into a suitable recipient, further comprising transferring a cell from the first generation embryo to a suitable recipient to form a second generation embryo.

Group III, claim(s) 23-25, drawn to a method of preparing embryonic stem cell lines comprising reconstructing a mammalian embryo by transferring a mononuclear cell from the blood or natural secretion of a mammal into a suitable recipient, and transferring the embryo to a culture system or isolating the inner cell mass of the embryo and transferring the inner cell mass to a culture system.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Methods of producing a reconstructed embryo by nuclear transfer of a cell nucleus into an enucleated oocyte were known in the art at the time of filing. As taught by Campbell et al (1997), sheep were produced by transfer of either an embryonic somatic cell or an adult somatic cell (page 811, Table 1 and Figure 1).

A telephone call was made to Mr. John Holman on January 9, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1632

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
